December 2024

PROJECT HIGHLIGHTS

As we reach the end of the Skills4VET-app project, we want to celebrate the progress we've made together in supporting Vocational Education and Training (VET) students across Europe.

- **Launch of the Skills4VET-App:** Our website now provides VET students with interactive tools to build skills that align with current job market needs.
- **Innovative Training Modules:** We developed modules that focus on practical skills, making VET education more relevant and engaging.
- **Collaboration Across Europe:** Working with VET institutions and industry partners, we ensured the Skills4VET-app resources are meaningful and aligned with industry standards.

Moving Forward

While the project is concluding, we encourage you to continue using and sharing Skills4VET-app resources to empower VET learners.

Closing Remarks

Thank you to all the partners, educators, and students who helped bring this vision to life. Your support has made this project a success, and we're excited to see the ongoing impact of Skills4VET-app in VET education across Europe.
