

## Newsletter n.2

March 2024

### One-year milestones

In the project's first/kick off meeting online meeting, the consortium established foundational elements and goals for successful completion. A user-friendly website serving as a central hub for stakeholders was subsequently developed. This platform provides real-time updates and guides on utilizing project tools. Additionally, a comprehensive survey was conducted to assess various aspects, including trainers' encouragement of apprenticeships and mobility programs, and necessary knowledge for trainers in rural areas. This data is crucial for tailoring project tools to address identified needs.

### Digital Report findings

Research identified key competencies for VET trainers to guide learners towards apprenticeships and enhance their employability. These include fostering international mobility, promoting inclusive opportunities, and motivating NEET/unemployed individuals. The study highlights the importance of equipping trainers with skills to develop critical thinking, problem-solving, and address student emotional needs. Utilizing hybrid teaching methods to cultivate lifelong learning is also emphasized.
